## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

 DIVISION OF WATER RIGHTS  
 SACRAMENTO

 A. Name of person diverting water: Big Vineyards  
 Address: 5223 Big Ranch Road Telephone: 226-3744

 B. Name of body of water at point of diversion: Milliken Creek  
 Tributary to: Napa River

 C. Place of diversion: NE 1/4, SW 1/4 Section 35, Township 6N, Range 4W, MD B&N,  
Napa County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

 D. Name of works: Milliken Creek Intake

 E. Capacity of diversion works: 1200 cubic feet per second  
 Capacity of storage reservoir: 22 ACRE FT. gallons per minute  
 State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1981			8	12	10								30

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

100 Acres wine Grapes  
 Maximum annual water use in recent years: 30 ACRE FT. gallons  
 Minimum annual water use in recent years: 30 ACRE FT. acre-foot  
 Type of diversion facility: gravity \_\_\_\_\_, pump X

 Method of measurement: weir \_\_\_\_\_, flume \_\_\_\_\_, electric power meter \_\_\_\_\_, water meter \_\_\_\_\_, estimate X

 F. Purpose of use (what water is being used for): Frost protection - replenishment of stored water

 G. General description or location of place of use (use sketch of section grid on reverse side if you desire):  
see map which accompanies Application 2A125

 H. Year of first use as nearly as known: 1973

 I. Name of person filing statement: Ray DeLani  
 Position: MANAGER Organization: BIG VINEYARDS  
 Address: 5223 BIG RANCH RD Telephone: 226-3744

 I declare under penalty of perjury that the above is true and correct to the best of my knowledge and belief.
